M

similarly please add table and edit optin in subjects.js also

Absolutely! Let's add the table and edit option to the `subjects.js` page. We'll follow a similar approach to the one we used for the `departments.js` page.

Updated subjects.jsPage with Table and Edit/Update Functionality

1. **Create/Update the `subjects.js` page:**

Javascript   Copy

```javascript
// pages/subjects.js
import React, { useState, useEffect } from 'react';
import axiosCourses from '../lib/axiosCourses';
import Table from '../components/Table';
```
